### COURSE DESCRIPTION & OBJECTIVES

This course combines the methods and teachings of security analysis with practical buy-side methodologies to identify and research attractive value investments. Emphasis will be placed on the development and implementation of a sound and repeatable research process. Both long and short methodologies will be covered during the semester.

This course will leverage your theoretical learning in security analysis plus require you to develop business acumen and industry expertise. A combination of fundamental analysis and assessment of intrinsic value will be balanced with thematic thinking and business judgment. The course should arm you with the tools to identify attractive value investments.

Students will be expected to have mastered these concepts and be able to apply them in the course.
investments through a variety of methodologies for several alternative fund strategies. Throughout the semester, students will prepare five full investment memoranda on assigned stock securities. After the first name, which will be assigned to the entire class, subsequent stocks will be assigned to small groups of students. Certain students will be required to develop the long thesis while others develop the short thesis. Ultimately each student will select one of their ideas to further develop (long or short) for a final presentation to the class and outside fund managers. The class will be kept small to take advantage of the instructional method. Class discussions will be complemented by guest discussions from highly regarded investment professionals from the long only and hedge fund community.

Investment Memos: Discussion and argument on assigned stocks will begin the week following their assignment. The ability to quickly get up to speed and identify the critical issues is an important skill and will make up much of the class
participation grade. Deliverable will be a draft model with key drivers and research objectives, followed by a full investment write-up and supporting model (due about three weeks after the stock is assigned).

Final Projects: Students will rank their write-ups in order of preference for a final presentation; these preferences will be considered in assigning final projects. The final project deliverable will be a ten minute investment pitch with supporting slide deck, appendices and detailed model.

Weekly Assignments:

- On each Sunday prior to class (8:00 AM deadline), submit a memo and a model on the name you are working on. In the first week, your memo will include key questions for research and analysis. Subsequent submissions will show your research progress towards an investment decision.
- Each class students should be ready to give a market update (format will be discussed in class), plus an update on any news related to their assigned stocks.
- Additional assignments will be made as the semester progresses. These will usually involve readings or exercises that can be accomplished within an hour or two.

**Note above assignments / due dates may be modified**
