B8331 REAL ESTATE FINANCE
Summer A 2020

PROFESSOR: BRIAN P. LANCASTER
Phone: 860-898-0436
E-mail: blancaster.nyc@gmail.com
Office Hours: Please contact me and we can arrange a meeting or call.

TEACHING ASSISTANT
TBD
Phone: TBD
Email: TBD
Office hours: by appointment

Communications from professor and teaching assistants about the course will take place through Canvas. Students should make sure they regularly check for announcements and messaging notifications.

SCHEDULE AND LOCATION
Tues, Thurs 9:00AM-12:15PM
Classroom: Warren 207

COURSE DESCRIPTION
The objective of the course is to teach you the fundamental concepts, analytical methods, tools and models used for making commercial real estate finance and investment decisions. For example, how investors acquire real estate properties by issuing a variety of debt and equity claims. The course will focus primarily on income producing properties (i.e. commercial real estate).

The general approach will be to teach you first the fundamental principles, the math, the spreadsheet, the logic of real estate finance and then to apply this to the “reality” of real estate finance – considerations you have to take into account at the sidewalk level.

The course is designed to ensure that you have a thorough understanding of the “science” (the theory and models) as well as the “art” (reality) of real estate finance and real estate investing. The approach utilizes a rigorous, unified finance-based framework in the lectures and spreadsheets that integrates risk and expected return to answer real estate investment decision-making problems encountered in the real world, such as deciding between the investment returns of two properties, what is an appropriate risk adjusted borrowing rate, when should vacant land be developed etc. Understanding theory in Real Estate finance is also important in that without it one tends to merely extrapolate from existing conditions without seeing the bigger picture.

This theoretical approach is complemented in the lectures and case studies with the “art” of real estate investing - real situations to help students gain a deeper understanding of the issues both by applying these concepts and seeing the limitations of these principals and models when applied to reality. For example, what are the best assumptions to make in modeling cash flows for cap rates, vacancies etc. How sensitive is our analysis to our assumptions? How do we account for vacant land adjacent to a shopping mall we may consider developing? How do the physical attributes of a

1 A brief biography of Professor Lancaster is at the back of this syllabus.
property impact its value (floorplates, windows, views) etc? The professor’s professional background is leveraged to provide students with real situations and examples that support and sometimes contradict theory to help the students gain a deeper understanding of Real Estate Finance.

By the end of the course you should have: a solid understanding of how to directly invest and value real estate properties as well as distressed debt; when and how to use leverage, how to invest indirectly in real estate through various vehicles, such as private equity, real estate investment trusts, CMBS and other forms such as mezzanine debt and finally...How to make money!

REQUIRED COURSE MATERIALS

Course Handouts: Powerpoints of lectures, readings, and cases will be available on CANVAS before classes. Students should make sure to read lecture powerpoint slides and readings for each class BEFORE each class. They may bring their lecture powerpoint slides with them to class, however powerpoint slides will be provided at the beginning of each class so that students may take notes on them. Readings that are optional are indicated. They are provided if students wish a deeper look into a particular topic. They are also helpful additional reference documents to keep should you pursue a career in real estate finance. Lectures will be recorded and made available on demand.

Reference Books:
• Real Estate Finance and Investments: Risks and Opportunities by Peter Linneman (5th edition)—Strongly suggested
  This book provides background material and context for many of the concepts covered in class. It is also useful as a reference book should you wish to pursue a career in commercial real estate.
• Commercial Real Estate Analysis and Investments by Geltner and Miller, with Clayton and Eichholtz, (Southwestern Press, 2nd edition)- Recommended. This book is a very useful reference that provides a more detailed coverage and offers more quantitative analysis.
• These two books are complementary to each other and are available for purchase at the bookstore or online. Four copies of each book are available at the library.

CONNECTION TO THE CORE
• Corporate Finance: Time value of money, risk, CAPM, Modigliani Miller Theorem, arbitrage pricing and the law of one price, efficient markets, frictions.
• Managerial Economics: Maximization and thinking on the margin, analyzing complex decision-making under uncertainty, understanding market competition and equilibrium thinking.
• Managerial Statistics: Statistics data analysis, probability intro, conditional probability, modeling uncertainty.
• Global Economic Environment I: What causes inflation, what drives employment, what are the causes of business cycle, what are the effects of monetary policy, what is the role of financial markets in the economy.

CLASSROOM NORMS AND EXPECTATIONS
Students are expected to adhere to CBS Core Culture in this class by being Present, Prepared, and Participating.

Please bring and post name plates in every class. Class participation counts for 10% of your course grade. Please participate. The course is cumulative, so being lost gets quite costly very quickly. TAs will take attendance and note class
participation. Excessive unexcused absences from class will weigh more heavily than 10% on your grade. Lack of participation can reduce a grade by one or two levels. Constructive comments in class will increase the participation points. All cell phones, iPads, laptops, Blackberries, and other electronic devices unless used for note taking must be turned off. Absences or late arrivals will be considered as a factor in class participation. Materials covered by guest lecturers are required.

For team work, it is expected that students participate equally in homework assignments and cases. If team members report that some team members are not doing their fair share of the work, the grades of those who are not, may be marked down significantly.

We welcome back and congratulate our long time guest speaker Ken Caplan of Blackstone. Given Ken’s new senior role as co-head of Global Real Estate at Blackstone (the position formerly held by Jon Gray), enrolled students may invite non-enrolled students to attend that class with the professor’s permission. We are also excited to have again Peter Lewis, CEO, Wharton Equity Partners who has been very well received by students. Students are required to study any materials guest speakers provide and come to class with thoughtful questions and participate fully in class discussions. Students shall not use any devices while guest speakers are speaking.

Several changes incorporating greater focus on international real estate and private equity real estate may be made to this syllabus.

<td>15%</td>
</tr>
<tr>
<td>Midterm &amp; Final Exam</td>
<td>45%</td>
</tr>
</tbody>
</table>
Assignments: There will be homework assignments and cases. They jointly account for 50% of your grade. Homework assignments and cases will be completed in groups up to a maximum of 3 students. It is your responsibility to form the group. Assignments should be turned in at the beginning of class on the day it is due. Late assignments will not be accepted.

Midterm: The midterm exam covers material for the first half of the lecture. It is only offered in class. Make-ups are not given unless you have written authorization from the Office of Student Affairs (OSA).

Final Exam: The final exam covers material primarily from the lectures after the 1st midterm. Some material from the first half of the class may also be included. It is only offered in class. Make-ups are not given, unless you have written authorization from the Office of Student Affairs (OSA).

Case 1 actually consists of 3 cases: Sunset Apartments, Duke Office, Byline Industrial.

There is likely to be one additional “raw case” associated with a guest speaker regarding the origination of an actual recent, large commercial real estate loan. If this happens students must be prepared to discuss the case in class with the guest speaker and turn in a one page writeup that will be graded and taken into consideration in the case course grade.

The readings distributed over the semester are to help you better understand concepts and materials covered in class. Materials only in the readings but not covered in class are not required for the exams.

ASSIGNMENTS
All of your assignment submissions are subject to the CBS Honor Code. Violations of the CBS Honor Code may lead to failing the assignment, failing the course, suspension, and/or dismissal. In order to avoid ambiguity that may lead to unintentional violations of the Honor Code, assignment description types have been standardized and specified below.

* The designated group can be either an assigned study group or a self-selected one.

ATTENDANCE POLICY
Students are required to attend each class. Students should reach out to the Office of Student Affairs (OSA) by using Core Absence Form on this course’s Canvas page regarding excused absences (for religious observances; personal, medical, and family emergencies; military service; court appearances such as jury duty). Unexcused absences will affect your course grade.
NOTE: The following is applicable for Core Courses and influences the professor's judgment in this course:

- Students that miss more than 33% of their classes (unexcused absences) will at most receive a **P for the course grade**
- Students that miss more than 50% of their classes (unexcused absences) will receive a **F for the course grade**

NOTE: The following is applicable for Core Courses and for any electives with OSA-administered exams:

- Students that miss the exam for an **excused** reason but are unable to take the exam within the stated make-up period will receive a **zero for the final exam grade**
- Students that miss the exam without notifying OSA (**unexcused**), will receive an **F for the course grade**

Taking exams off schedule creates significant logistical challenges in finding rooms and proctors and most importantly, has the potential to jeopardize the integrity of the exam. Therefore, requests for rescheduling of exams should only be made within the first three weeks of the semester and only for serious conflicts. Rescheduling of exams for weddings, early travel home are not acceptable. Last minute rescheduling of exams may only be done for very serious cause.

**INCLUSION, ACCOMMODATIONS, AND SUPPORT FOR STUDENTS**

At Columbia Business School, we believe that diversity strengthens any community or business model and brings it greater success. Columbia Business School is committed to providing all students with the equal opportunity to thrive in the classroom by providing a learning, living, and working environment free from discrimination, harassment, and bias on the basis of gender, sexual orientation, race, ethnicity, socioeconomic status, or ability.

Columbia Business School will make reasonable accommodations for persons with documented disabilities. Students are encouraged to contact the Columbia University’s Office of Disability Services for information about registration. Students seeking accommodation in the classroom may obtain information on the services offered by Columbia University’s Office of Disability Services online at [www.health.columbia.edu/docs/services/ods/index.html](http://www.health.columbia.edu/docs/services/ods/index.html) or by contacting (212) 854-2388.

Columbia Business School is committed to maintaining a safe environment for students, staff and faculty. Because of this commitment and because of federal and state regulations, we must advise you that if you tell any of your instructors about sexual harassment or gender-based misconduct involving a member of the campus community, your instructor is required to report this information to a Title IX Coordinator. They will treat this information as private, but will need to follow up with you and possibly look into the matter. Counseling and Psychological Services, the Office of the University Chaplain, and the Ombuds Office for Gender-Based Misconduct are confidential resources available for students, staff and faculty. “Gender-based misconduct” includes sexual assault, stalking, sexual harassment, dating violence, domestic violence, sexual exploitation, and gender-based harassment. For more information, see [http://sexualrespect.columbia.edu/gender-based-misconduct-policy-students](http://sexualrespect.columbia.edu/gender-based-misconduct-policy-students).

**PROFESSOR’S BIOGRAPHY**

Professor Lancaster has over twenty five years of professional experience in real estate finance and capital markets including his current role as President, The Minot Group, LLC voted one of Forbes “America’s Best Management Consulting Firms” (2017, 2018, 2019, 2020) (real estate finance and capital markets consulting to hedge funds, private equity, REITs, banks and insurance companies); Co-head Financial Analytics and Structured Transactions, RBS; Chief
Investment Officer, $86B Real Estate Division, Wachovia/Wells Fargo; Head of Commercial Real Estate Research, Wachovia Capital Markets; Head of Structured Products Research, Wachovia Capital Markets; Managing Director Principal Bear Stearns (commercial and residential real estate and securities); Senior Capital Markets Economist Federal Reserve Bank of NY and Bank of England.

He also invests in real estate development projects, distressed real estate, real estate private equity in Asia, mezzanine and bridge funds, securitized products and developed condominiums in NYC. His passion for real estate started with his work on the redevelopment of Boston’s waterfront as a sophomore at MIT.

He is a full time professor in the MBA program at the Columbia Business School where for the last three years he has taught the following courses: Real Estate Finance; Real Estate Debt Markets; Residential Real Estate: Dirt, Debt and Derivatives; Debt Markets; Capital Markets and Investments; as well as co-taught with Professor Zach Aarons, Real Estate Entrepreneurship. He has also been faculty sponsor for Chazen trips to Thailand, East Africa (Tanzania and Rwanda) and faculty sponsor for Real Estate Association/Chazen Trips (most recently scheduled for Australia). He was formerly an adjunct professor at the Columbia Business School for two years and two years at the Stern School of Business, New York University.

He holds a BSc in Economics from the Massachusetts Institute of Technology, an MBA in Finance, Stern School of Business, New York University, and a Master of International Affairs and Public Policy, Columbia University.

He is a former board member of the Commercial Real Estate Finance Association, a former Executive Committee member of the Mortgage Bankers Association and Editor in Chief of Commercial Real Estate Finance journal. He periodically lectures at Duke University and the Wharton School of Business, University of Pennsylvania.
